#### **Material & Product Details**

**Steel** sections are all mild steel to the relevant BS EN steel standards

Plastic panels are made from long lasting HDPE

Chains are 8mm short link sherardised mild steel

**Fixings** are mostly BZP, high tensile steel, hex head bolts with washers and Nyloc nuts

#### Coatings

All steel equipment made by Play & Leisure is shotblasted to SA 2.5 before a 60-micron thick epoxy-based zinc phosphate primer is applied and finally a 70 micron thick coating of polyester powder.

#### **Installation Instructions**

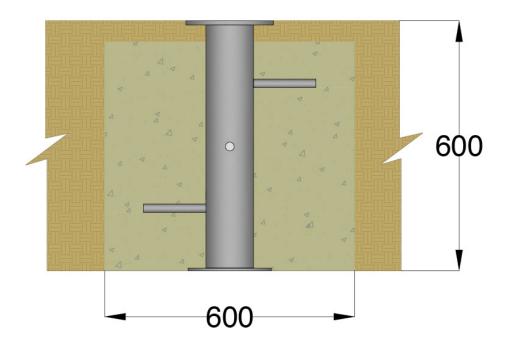

- 1. There is no requirement for safety surfacing beneath outdoor fitness equipment, but please observe the 1.5m minimum space requirement for each item of equipment (drawings available)
- 2. Excavate hole and lower ground anchor/base into position and level in all directions. See Fig 1
- 3. Pour in 0.2m³ of low slump concrete and vibrate down with vibrating poker.
- 4. Re-check levels ensuring base plate is horizontal and level

Do not leave unattended until satisfied the concrete has cured or the site is secure.

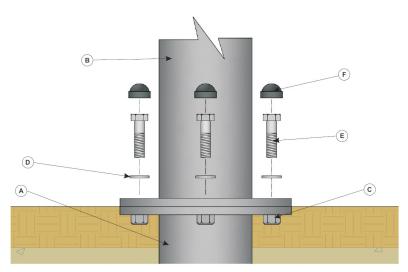

- 5. Re-instate the ground around the base plate, as desired, to the level shown in Fig. 1
- 6. Bolt fitness equipment to the base using M12 x 45 bolts, finished with black caps. See Fig 2.

### Foundation Detail (fig. 1)

## Post Attachment (fig. 2)

Ref	Part Description	Part No.	Qty
Α	Ground Anchor & Base		2
В	Main Post & Pre-assembled Kit		1
С	Captive Nut		N/A
D	M12 Steel Washer		8
E	M12 x 45mm Hexagonal Bolt		8
F	M12 Black Plastic Cap		8

# **Maintenance Schedule**

#### **Maintenance & Inspection**

All Play & Leisure's products should be inspected and maintained in accordance with the recommendations as detailed in BS EN 1176-7:2008

If any part of the equipment is found to be unsafe during an inspection and cannot be immediately rectified the equipment should be protected against further use.

#### **Routine Visual Inspection.**

Routine visual inspections are to be conducted to identify obvious hazards resulting from vandalism, use or weather conditions. e.g. Hazards such as broken parts or broken bottles.

#### Operational Inspection.

To reduce accidents the operator should ensure an appropriate routine maintenance schedule is established, implemented and maintained. Inspection shall be carried out on a monthly basis, although consideration should be taken regarding local conditions and usage.

During a operational inspection the following should be included:

- Tightening of fastenings.
- Re-painting and re-treatment of surfaces.
- Maintenance of any impact attenuating surfaces.
- Lubrication of bearings.
- Marking of equipment to signify loose fill finished surface levels.
- Cleaning.
- Removal of broken glass and other debris or contaminants.
- Restoring loose fills to the correct level.
- Maintenance of free space areas.

#### **Annual Main Inspection (NOT EXCEEDING 12 MONTHS)**

Inspection intended to establish the overall level of safety of equipment, foundation and playing surfaces.

- Effects of weather.
- Rotting or corrosion.
- A change in the level of safety of the equipment as a result of repairs made, or of added or replaced components

#### One Post Equipment Maintenance.

Special attention should be paid to the stability of products being of a one post design.

#### **Corrective Maintenance.**

Corrective maintenance should include measures to correct defects, or to establish the necessary levels of safety of the playground equipment and surfaces. Such measures should include:

- Replacement of fastenings.
- Welding or welding repairs.
- Replacement of worn or defective parts.
- Replacement of defective structural components.

#### **Equipment Alterations.**

Alterations to parts of any products that could affect the essential safety of the equipment should only be carried out after consultation with Play and Leisure.

#### **Equipment Identification**

Information regarding the manufacturer, I.D. Number, year of manufacturer and the European Standard is displayed on an identification plague.
